MANAGEMENT DISCUSSION AND ANALYSIS REPORT

OPPORTUNITIES

Textile industry plays a significant role in the economy. The Indian textile industry is one of the largest and most important sectors in the economy in terms of output, foreign exchange earnings and employment in India. It contributes 20 per cent of industrial production, 9 per cent of excise collections, 18 per cent of employment in industrial sector, nearly 20 per cent to the country's total export earnings and 4 per cent ton the GDP. According to D.R. Mehta, president of the Textile Association of India, the country expects its textile and apparel exports to reach \$80 billion by 2020. The Indian government has included substantial investment in textile and apparel sector in their 11th five-year plan. This includes investments in new textile parks and various investment incentives and training programs. There is large potential domestic and international market for textile. India has several advantages in the textile sector, including abundant availability of raw material and labour. It is the second largest player in the world cotton trade. It has the largest cotton acreage, of about nine million hectares and is the third largest producer of cotton fibre in the world. It ranks fourth in terms of staple fibre production and fourth in polyester yarn production. The textile industry is also labour intensive, thus India has an added advantage. With a view to raise India's share in the global textiles trade to 10 per cent by 2015, the Ministry of Textiles proposes 50 new textile parks. Out of the 50, 30 have been already sanctioned by the government (with a cost of US\$ 710 million). Set up under the Scheme for Integrated Textile Parks (SITP), this initiative will not only make the industry cost competitive, but will also enhance manufacturing capacity in the sector.

THREAT

Unavailability of trained man power, competitions from other developing country, technology obsolesce, labour force giving low productivity as compared to other competing countries. Domestic market extremely sensitive to fashion fads and this has resulted in the development of a responsive garment industry. India's global share is just 3% while China controls about 15%.
